

My name is Lynn Neiss, founder of Brut Manufacturing in Navarre, Ohio and an authorized dealer of New Age Media. As an owner of a company that produces automotive repair, restoration and sandblasting equipment for customers around the world; I often am asked if I could recommend an abrasive that is faster than sand, cleaner than sand, or an abrasive that doesn't warp metal. I acknowledged there was no magic bullet and often recommended 3 different products until I discovered New Age Media Grit. Our customers have been using this product for 2 years and have given it the nickname "Speed Grit" because of the quickness it completes the job. The magic is truly the New Age Media Grit and I have not found a better product for me and my customers.

A handwritten signature in cursive script that reads "Lynn Neiss".

Re: Blast media

I wanted to write to personally thank Steve Mellon for the excellent advice he gave us regarding on-site blasting problems.

After contacting several vendors on how to rectify in-field issues with media and humidity, Steve offered the best practical solution. Not just to make a sale but help a customer, his advice has served us well ever since. This product works very well and I am quite satisfied.

The personal service is greatly appreciated. Best wishes to you and your company.

Respectfully submitted,

A handwritten signature in black ink that reads "Lionel Maurier". The signature is written in a cursive, flowing style.
