Using New Age Media Blast has been a blessing. We have come up on a LOG HOME that had 15 years of stain, clear coats and even paint. We were set in our ways and used only corn media.

The New Age Media fine has outperformed the corn by a long shot. The lower cost, less labor, more efficient and cost effective all the way around.

It is very versitile, we have also done a 1955 Chevy again the fine removed the paint and rust back to bare metal with no problems. As for using sand, that is OUT! Sand will warp the metal. Not the New Age Media.

We then tried it out on Graffiti at our towns Skate park, in our county. Once again needless to say WOW!

I was able to remove a layer of RED spray paint, and then a Layer of BLACK spray paint. During the seminar I explained the process.

When I completed the removal of 2 separate layers of spray-paint from the concrete. All was accomplished without etching the concrete.

Now that's bragging rights.

We send all thanks to everyone at New Age Media Blast
